

The Problem

Indoor air pollution is considered by the EPA and Congress to be America's #1 environmental health issue. Tightly sealed buildings and homes may be more energy efficient but can trap pollutants and microbes indoors, causing allergies, odors, mold and illness. Indoor air pollution can cause or worsen:

- Eye and skin irritation
- Nose, throat and lung irritation
- Musty odor
- Fatigue

The Solution

The Plug-In Plus Natural Air Purification System effectively treats up to 1000 sq.ft. of home or office area utilizing a PHI-Cell™. The unit plugs directly into a duplex grounded outlet and is designed to be inconspicuous. The Plug-In Plus can be secured with a provided anti-theft mount and used with or without its internal low-decibel fan. The unit is an air treatment system, not a filter, and the only maintenance is changing the PHI element.

The Plug-In Plus will reduce odors, mold, bacteria and viruses up to 99%. It will also reduce odor and VOCs up to 97%. Normal reductions are at least 90% for all microbials.

Independent tests and studies validate manufacturer's claims and are available upon request.

Specifications

Dimensions:	6.25" w x 3.75" d x 10" h
Electrical:	110VAC, 50 watts
Controls:	Off/Low/High
Weight:	2 lbs.
Materials:	Aluminum/Polymers

The Benefits

- Effective on odors, mold, bacteria, viruses and smoke
- Economical and compact—adds 2 electrical outlets to existing plug
- Low maintenance
- No wiring required
- Built in night light
- Lightweight—easy to move
- 3 year warranty

The Manufacturer

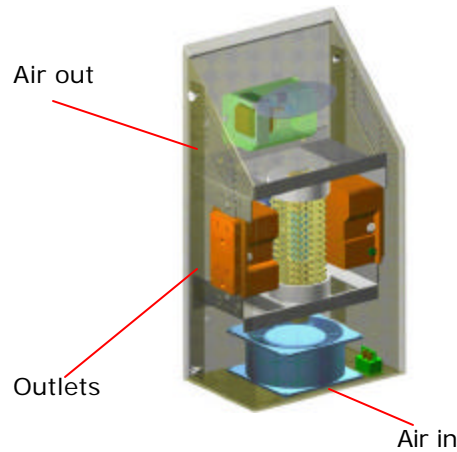

The Plug-In Plus is manufactured by RGF Environmental, a leading developer of environmental systems for air, water and food purification since 1986. RGF's customer list includes GE, Caterpillar, Ford, Halliburton, Bosch, Mercury, the U.S. Military and the Chinese government.

Easy Installation

Optional anti-theft mounting screws

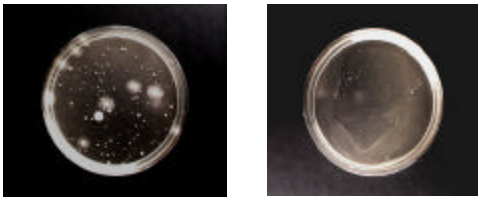

The Plug-In Plus

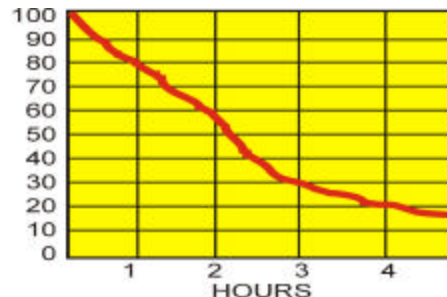

Actual lab tests showing 90%+ reductions of airborne bacteria and mold

BEFORE

AFTER

% ODOR REDUCTION

The Plug-In Plus is easily plugged into an existing grounded duplex outlet. If theft is an issue, a security mounting screw is provided.

The PHI-Cell™ is the main component of the Plug-In Plus. The PHI-Cell contains a quad-metallic hydrated target that acts as a catalyst for a hydroxyl radical chemical reaction. Forty chemical processes occur in a short period of time, aggressively cleansing the air of contaminants and re-forming oxygen. The bulbs are protected by a unique sleeve that prevents mercury release into the indoor environment should a bulb break.

The unit is designed to operate either with or without a very quiet internal fan.

Who can benefit from the Plug-In Plus?

- A person with a musty or damp home or office building
- Someone with allergies
- Anyone with respiratory issues
- An office building that is shut tight
- A home near the beach or in an area of high humidity
- A home that uses air conditioning three or more months a year
- Any building where bacteria and odor are a concern, such as a school, day-care, hospital or assisted living
-
